

Recommended supplies for new Poultry!

Teacher email: etyra@ccisd.net

POULTRY REMIND Text 81010 @fa93k8k

- 2 Waterers (pay attention to size)
- Feeders
- Bedding (shavings, flakes, etc.)
- Box Fan
- Heat lamps
- Tarps
- Scale
- Boxes to start young
- Cleaning supplies
- Buckets
- Feed bins
- Extension Cords
- Zip ties
- Feed; Ex: Purina Honor Show Poultry Feed
- When moving poultry into the barn, it is best to slowly allow them to have space as they grow. Keep them confined.
- Pens are cleaned out every week to week and a half.
- It is important to monitor wing bands as your broiler/turkey grow. Rotate/expand them regularly.
- You will have to cull and take birds to the processor.
- Shavings are dumped into the DUMPSTER, not water drains.
- Students can spend anywhere from 1 hour to 4 hours cleaning out pens, supplies, and getting their birds to move and walk around.
